

### **Skip Counting**

Teacher: Hang on. I know you guys can count all of them. But I'm going to teach you how to count by fives. So we're going to skip all of the black numbers, and we're just going to say the red numbers. Okay, I'm going to start first, and if you think you've got it, you can say it with me, okay?

Teacher and children: 5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 55, 60, 65, 70, 75, 80, 85, 90 95, 100.

Teacher: So what you guys just helped me do is we skip counted. We counted by fives all the way to a hundred.
